* the price for capacity overrun is calculated for the daily allocated natural gas quantity at entry and exit points of the gas transmission system exceeding the total booked capacity at the respective points.
 ** Interruptible capacity products are priced at a discount depending on the actual reported interruption in their use

2. Commodity based prices

Commodity based price (BGN/MWh)	Value
Transmission component *	0,1789
Technological component **	0,3585
Component public service obligation ***	0,0240

* transmission component is charged at all entry and exit points/zones of the gas transmission system according to the allocated natural gas quantities at these points/zones.

** technological component of the commodity price is charged at all entry and exit points/zones of the gas transmission system according to the allocated natural gas quantities at these points/zones.

*** the component for covering costs related to imposed public services obligations is charged at all national exit points/zones of the gas transmission system, excluding exit points to natural gas storage facilities, according to the allocated natural gas quantities at these points/zones.

**** commodity prices do not include Value of added tax
